15000000

• **Figure 10.10** illustrates the relationship between the number of units produced and the total cost of production. The total cost curve is a straight line starting from the origin (0,0) and increasing linearly with the number of units produced. The slope of the line represents the variable cost per unit. The fixed cost is represented by the vertical intercept of the line, which is \$100,000. The total cost curve is a straight line starting from the origin (0,0) and increasing linearly with the number of units produced. The slope of the line represents the variable cost per unit. The fixed cost is represented by the vertical intercept of the line, which is \$100,000.
